Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The election of Group II, i.e., claims 24-37, filed May 26, 2005 is hereby acknowledged. *However*, in view of the amendment adding claims 42-68, an additional restriction requirement is advanced below.

The examiner respectfully disagrees with applicant's notation (at the top of page 9 in the remarks filed with the election on May 26, 2005), that "New claims 42-68 have been added, and are believed by the Applicants to be included in Group II". Since applicant has not distinctly pointed out why they believe that these new claims should be grouped with the elected invention, thus providing the examiner with some contrary information, arguments, or discussion, the examiner contends that the restriction requirement advanced below is proper.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims **24-37**, drawn to a merchandising system, classified in class 211, subclass 59.2.
- II. Claims **42-64**, drawn to a merchandising system, classified in class 211, subclass 59.4.
- III. Claims **65-68**, drawn to a merchandising system, classified in class 211, subclass 59.3.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as use without (a) the assembly being 'slidably engaged', as in claim 56, or (b) the "beveled" surface, as in claim 58, or

Art Unit: 3634

(c) the base including a back wall, as in claim 59, or (d) a second base, as in claim 61, or (e) a panel, as in claim 63. See MPEP § 806.05(d).

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as use without (a) a "pusher", or (b) providing the first member in a third configuration, as in claim 65. It is noted that a "pusher" is not considered to be the same as the "member". *Also*, in the instant case, invention III has separate utility such as use without a projection, as in claim 24. See MPEP § 806.05(d).

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as without (a) a "pusher", or (b) providing the first member in a third configuration, as in claim 65. It is noted that a "pusher" is not considered to be the same as the "member". See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3634

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
